

LN^V Construction celebrates Wesley Community Center completion with ribbon cutting

March 2015

CORPUS CHRISTI, TEXAS - Community members celebrated the completion of Wesley Community Center with a ribbon cutting March 12, 2015. The event signified the success of much needed renovations to the facility.

"We're going to be able to change so many lives with this remodel," said MaLinda Faughn, executive director of Wesley Community Center, "I could not have asked for a better team to work with."

LN^V provided construction services for this project, which comprised the remodel of the living quarters, floor and interior finishes, restroom additions, an updated kitchen, fire escape and ADA ramps.

The Wesley Community Center provides a much needed permanent housing option for women with young children in Nueces County. The organization serves a large number of homeless children living in emergency shelters and transitional housing facilities. The programs offer a healthy, developmentally appropriate learning experience that nurtures children to build confidence, character and self-worth. Wesley Community Center's childcare program for the homeless children provides services to over 200 homeless children each year. [Click here](#) for more information.
