

## LNV Beets World Hunger

February 2016

CORPUS CHRISTI, TEXAS - LNV was honored at the Canstruction Awards Ceremony during the Texas Society of Professional Engineers event on Friday, February 19, 2016 at the Holiday Inn Marina Downtown.

Canstruction is an international charity competition where members of the A/E/C community compete to design and build giant structures made entirely out of canned food. At the close of the competition, all canned food is donated to local food banks.

The LNV Canstruction team's structure was displayed at La Palmera Mall from February 6th to February 12th. All who passed by each of the six displays were asked to go online and vote for their favorite structure.

LNV was the only firm to be presented two awards, "People's Choice" and Juror's Choice". They also donated the largest amount of cans. The Canstruction team created a Valentine's Day-themed structure titled "Beet World Hunger". This structure included 2,967 cans of beets, black-eye-peas, black beans, diced tomatoes, chili and corn beef and stood about 6.5 feet tall. All canned goods were donated to the Food Bank of Corpus Christi.
